“Solutions that improve people’s lives”

Brief History

MedLogic Global Limited is a world leader in biomedical adhesive technology aimed at both the professional medical and consumer markets. Our patented biomedical cyanoacrylate technology has outstanding capability to revolutionise the way in which wounds are managed and vulnerable skin is protected.

MedLogic® was acquired by Advanced Medical Solutions in May 2002. Advanced Medical Solutions has a portfolio of products, which include synthetic polymers, polyurethanes, alginates, films and hydrocolloids. This partnership gives MedLogic® access to many of the manufacturing, research, development and commercial resources at Advanced Medical Solutions disposal, as well as taking advantage of Advanced Medical's global partnerships to increase business opportunities.

Our philosophy is to provide our customers with the products they need, when they need them. From design to delivery we strive to meet the requirements of an increasingly demanding global market. Our agility as a business and our capability to accommodate change is a key skill. Our well resourced facility with modern design and business systems provide the perfect environment for our talented and creative employees to produce products that provide our customers with the faster, simpler and safer products, that are required in today's evolving and ever changing climate. Our business support staff are housed in modern open surroundings each

fully resourced with the latest equipment and empowered to rapidly respond to the demands of both internal and external customers. All employees are trained to meet the needs of this customer driven business. Our commitment and accreditation to Investors In People is testament to this fact. MedLogic® is proud of its facility and its ability to provide a superb working environment for the company's greatest asset...it's employees.

MedLogic Global Limited was established in 1997 in Plymouth, England. Our 'State of the Art' manufacturing facility occupies 1500m², which includes two class 10,000 clean rooms. These provide a precisely controlled biological and climatic environment for the manufacture of sterile medical devices. Further space is dedicated to the manufacture, packaging and storage of non-sterile product.

Our quality management system has been endorsed by TUV Product Service Germany in respect of resources and control, to ensure compliance with total quality for each individual product and service created or carried out by MedLogic Global Limited, and is an integral part of our culture. We pride ourselves in the quality of product and service to our customers.

MedLogic Global Limited is accredited to ISO 9001, EN 46001, ISO 13485 and CGMP and fully utilises all its systems to ensure all products meet the requirements to carry the CE mark.

In a competitive world MedLogic Global Limited prides itself on not just talking to all our customers but listening to their needs; and delivering the solutions that delight them.
